Manager's Lowdown

I am pleased to announce that the Request for Proposals (RFP) for a new Integrated Library System is now complete and posted. If you would like to see the RFP you can find it at <http://www.yavapai.us/bids>. So far we have had one vendor confirm they are interested and another formally announce they are not interested. The last date that vendors can send us their Registration of Intent to Respond is February 19th. If a vendor does not send their Registration of Intent to Respond by that time they will be unable to submit a proposal. Their final sealed proposals are due on April 5th. I am very pleased and excited to moving onto the next phase of the project.

I would really like to take this opportunity to thank all of those people that helped with this process. First and foremost the RFP Committee dedicated dozens of hours towards the creation of the Specifications and Feature set. They truly did a phenomenal job.

Barbara Kile also has been interfacing with The Yavapai County Free Library District Board of Directors (AKA, the Yavapai County Board of Supervisors) and she has also been editing the RFP and related documents as well as helping to guide me through Yavapai County procurement. Her help has been much appreciated!

Michael Holmes has also been helping a great deal by not only being very supportive but also by providing the original RFP template that was a great starting point for the process. Chanel Wheeler is not only a valuable part of the RFP committee; she is also an excellent editor and found/created most of the essay questions that were entered into the RFP.

Kristina Jezairian is the attorney representing the YCFLD and subsequently the YLN. She has spent dozens of hours going over the RFP and the preferred contract. I could not have completed the document without her.

Lastly I would like to thank the members of the YLN Steering Committee for their patience and understanding throughout this process. I only hope the hundreds of hours that have been spent on this process so far has only had a minimal impact on the services we are providing.

The next step is to write the preferred contract. This document will act as a starting point for the contract negotiations. It will be added as an amendment to the RFP on February 19th. Then we can only wait to see who chooses to respond and what kind of responses we will receive. I will keep everyone up-to-date as events unfold.

I would also like to mention that the Enterprise upgrade was postponed at the last minute because some custom scripting was causing some problems with what displayed on Apple devices. After troubleshooting the problem (thanks to Chanel and all of her hard work) we have decided to continue on with the upgrade and address the Apple display problems after the upgrade is in place. We cannot adequately address the problems in our pseudo-test environment. The date for the upgrade will be sent out when it can be worked out with SirsiDynix.

Respectfully Submitted,

Corey Christians
Library Network Manager

Prioritization

Priority One: Resolve Current Helpdesk Requests

A help desk request, or work order, is the submission of a problem that one encounters during the normal operation of a YLN service. Requests are generally submitted via e-mail to help@yln.info. If a request is submitted via telephone, then a YLN staff person will create the request for the submitter. Help desk requests will always be our highest priority because in some cases a member library employee cannot complete a work function until the issue is resolved.

Total requests submitted: 65

Total requests resolved: 83

Total unresolved requests opened this month: 1

Total requests still open: 23

Priority Two: Draft and RFP for a new Integrated Library System

The time is here to start looking into purchasing a new Integrated Library System (ILS). Stage one is sending out the RFP.

Goal: Create a request for proposal for a new integrated library system.

Project Lead: Corey Christians

Progress:

- Install a wiki that can be used to gather information about what we want in a new ILS
- Test the wiki to make sure it works
- Send instructions out on how to use it
- Start having meetings to determine what we want in a new ILS
- Compile the results and add them to the wiki
- Form an RFP committee
- Survey the current ILS market
- Start work on the RFP
- Create a draft RFP
- Send the RFP out to the membership for comment
- Create the final draft
- Seek steering committee approval
- Distribute to all interested vendors

Priority Three: Migrate vhosts from VMWare ESXi to Microsoft HyperV

Currently several servers are running virtually on a VMWare ESXi virtual host. Some of them include the YLN website, RPA, EZproxy, DNS, and many many more. The YLN will be switching to Microsoft HyperV in order to increase data redundancy and to increase support availability. The MIS Operations team also uses HyperV which will allow deep support with this product. This will require purchasing a new server, migrating current virtual servers and converting existing virtual hosts to HyperV.

- Determine if HyperV will work in our Linux/Windows environment
- Spec out a new server that can house all existing virtual servers as well as any future servers.
- Receive approval to purchase the new server
- Order new server
- Receive the new server
- Migrate existing ESXi virtual servers to HyperV
- Wipe ESXi servers and install HyperV
- Set up the new server to back up to the old servers

Priority Four: Install BlueCloud Analytics

Currently the YLN uses Director's Station for all web-based statistical reporting. BlueCloud Analytics is meant to be a replacement for Director's Station. However, the products differ greatly. Because of this we have been holding off migrating to the new product until its functionality matches Director's Station.

Goal: Complete the transition to BlueCloud Analytics

Project Lead: Chanel Wheeler

Progress:

- Upgrade our BlueCloud framework to accommodate analytics
- Install BlueCloud Analytics.
- Create several test reports to verify functionality
- Create templates to match DS reporting
- Train member libraries once transitioned to BCA

Note concerning prioritization: The priority of projects may shift as individual portions are completed.

Prioritization

Priority Five: YLN Strategic Plan

While the YLN has been very good about technology planning, the overall vision and strategy of the YLN has been more elusive. The Executive Committee has been working on developing a vision, mission, and strategic plan.

Goal: Develop a strategic plan that will bring the YLN to the year 2025.

Project Lead: Corey Christians

Progress:

- Create a way to implement the plan
- Get approval for the updated plan
- Change the bylaws if necessary
- Distribute the new plan

Priority Six: Network-wide Electronic Resources

In order to address the burgeoning usage of electronic materials the Public Services will take the lead on looking to creating a Network-wide e-materials collection development policy or best practices document.

Goal: Discover a method to increase utilization, improve the customer experience, and increase acquisitions fairness throughout the Network.

Project Lead: Corey Christians

Progress:

- Conduct initial research into what potential problems may be resolved Network-wide.
- Get approval from the Steering Committee to pursue a solution with the Public Services Committee
- Work with Pub Serv to define problems.
- Create a subcommittee to create a plan
- Pub Serv approve plan
- Steering Committee
- New plan is implemented.

Priority Seven: SirsiDynix Supported Servers End-of-Life

After a certain amount of time vendors will no longer support hardware because it is considered outmoded. In other words parts become hard to find because they are no longer manufactured. Our servers will have this problem as of May 31st, 2016.

Goal: Have a solution in place to deal with outmoded hardware.

Project Lead: Corey Christians

Progress:

- Determine differing solutions to the problem considering we may be on a new ILS in two years.
- Present the solutions to the Executive Committee
- Present the solutions to the Steering Committee
- Analyze which option is superior based on cost and stability
- Purchase any equipment that is required
- Migrate data and go into production

Priority Eight: Implement BC Visibility

BlueCloud Visibility is a new product by SirsiDynix which converts our online catalog to a linked data model. This will make our records visible in search engines such as Google.

Goal: Implement BC Visibility

Project Lead: Chanel Wheeler

Progress:

- Receive a quote from SirsiDynix
- Get approval for the purchase
- Receive an implementation plan from SD
- Offload our bibliographic database to SD to be processed.
- Test the implementation.
- Go Live
- Advertise the new service

Prioritization

Priority Nine: Implement Blue Cloud Cataloging

Blue Cloud Cataloging will allow library staff to access Symphony cataloging from a web browser. The new product should have significant user interface improvements above the cataloging section in Work Flows.

Goal: Fully implement Blue Cloud Cataloging (BCC)

Project Lead: Chanel Wheeler

- Upgrade Web Services so we can use BCC
- Configure Web Services for the new service
- Test BCC to see how it works
- Create documentation
- Activate it for a test library to see how it works in a production environment
- Conduct a training session for all YLN users
- Activate it for the remaining libraries
