Monthly
Report

Manager's Lowdown

The ILS RFP Committee was hard at work all last month evaluating the proposals presented by each ILS vendor. A subset of the ILS RFP Committee also contacted customer references for each product to get a better idea of how each product performs in a live environment. The effectiveness of customer support as well as training was also addressed during the reference calls.

The decision was also made to cancel the local vendor demonstrations. A subset of the RFP Committee was planning to go on-site to two customers to evaluate the TLC and III products. These on-site evaluations were also canceled.

After careful review of the proposals and after customer reference calls were conducted, the ILS RFP Committee decided further evaluation was not necessary. A final determination on product selection will be made on June 1st by the YLN Steering Committee based on the report provided by the ILS RFP Committee. Letters to the successful and unsuccessful vendors will be sent after the final decision is made.

The next evaluative process to begin will be concerning the RFID and AMH systems. The current contract with TechLogic is being renewed in one-year intervals. The YLN is considering pursuing a joint evaluative process with Coconino County Free Library District who have been working on an RFID contract for several months. I have reached out to Heidi Holland to have a preliminary discussion on the possibility. However, they may be too far along in their process for us to combine our efforts.

The YLN will also be transferring several Symphony and Symphony-related servers to a new VMWare virtual host in June. The process will start on May 31st with a connection test to the new servers. The schedule for the transition is as follows:

Test Platform Migration:

Remote connection confirmation - May 24

Platform migration - setup Test - May 31

Oracle to Oracle platform migration Test - June 7

Production Platform Migrations:

Platform migration - setup - June 2

Oracle to Oracle platform migration - remote - June 20

Software install - StaffWeb - June 21

Software install - Director's Station - June 22-23

Director's Station - quality check - June - June 24

At this point in time SirsiDynix has stated **SYMPHONY WILL ONLY BE DOWN ON JUNE 20TH**. They have not extrapolated further by stating how long we will be down on the 20th or when the down time will begin. I have asked them for more information so we can get an exact range for the downtime. Please let me know if you have any questions or concerns.

Respectfully Submitted,

Corey Christians
Library Network Manager

Prioritization

Priority One: Resolve Current Helpdesk Requests

A help desk request, or work order, is the submission of a problem that one encounters during the normal operation of a YLN service. Requests are generally submitted via e-mail to help@yln.info. If a request is submitted via telephone, then a YLN staff person will create the request for the submitter. Help desk requests will always be our highest priority because in some cases a member library employee cannot complete a work function until the issue is resolved.

Total requests submitted: 68

Total requests resolved: 64

Total unresolved requests opened this month: 4

Total requests still open: 25

Priority Two: Draft an RFP for a new Integrated Library System

The time is here to start looking into purchasing a new Integrated Library System (ILS). Stage one is sending out the RFP.

Goal: Create a request for proposal for a new integrated library system.

Project Lead: Corey Christians

Progress:

- Install a wiki that can be used to gather information about what we want in a new ILS
- Test the wiki to make sure it works
- Send instructions out on how to use it
- Start having meetings to determine what we want in a new ILS
- Compile the results and add them to the wiki
- Form an RFP committee
- Survey the current ILS market
- Start work on the RFP
- Create a draft RFP
- Send the RFP out to the membership for comment
- Create the final draft
- Seek steering committee approval
- Distribute to all interested vendors

Note concerning prioritization: The priority of projects may shift as individual portions are completed.

Priority Three: Select an ILS Vendor

The next step in the RFP process is to evaluate the proposals once they are received and determine which three products will be evaluated onsite.

Goal: Determine which three products will make the short list.

Project Lead: Corey Christians

- Receive the sealed proposals
- Open the sealed proposals
- Compile the proposals into one reviewable document
- Create a criteria for proposal evaluation
- Determine which vendor offerings best meet the established criterion
- Create a report detailing the winner
- Present the results to the Steering Committee
- Get Steering Committee Approval
- Notify Vendors of the selection result

Priority Four: Install BlueCloud Analytics

Currently the YLN uses Director's Station for all web-based statistical reporting. BlueCloud Analytics is meant to be a replacement for Director's Station. However, the products differ greatly. Because of this we have been holding off migrating to the new product until its functionality matches Director's Station.

Goal: Complete the transition to BlueCloud Analytics

Project Lead: Chanel Wheeler

Progress:

- Upgrade our BlueCloud framework to accommodate analytics
- Install BlueCloud Analytics.
- Create several test reports to verify functionality
- Create templates to match DS reporting
- Train member libraries once transitioned to BCA

Prioritization

Priority Five: YLN Strategic Plan

While the YLN has been very good about technology planning, the overall vision and strategy of the YLN has been more elusive. The Executive Committee has been working on developing a vision, mission, and strategic plan.

Goal: Develop a strategic plan that will bring the YLN to the year 2025.

Project Lead: Corey Christians

Progress:

- Create a way to implement the plan
- Get approval for the updated plan
- Change the bylaws if necessary
- Distribute the new plan

Priority Six: Network-wide Electronic Resources

In order to address the burgeoning usage of electronic materials the Public Services Committee will take the lead on creating a Network-wide e-materials collection development policy or best practices document.

Goal: Discover a method to increase utilization, improve the customer experience, and increase acquisitions fairness throughout the Network.

Project Lead: Corey Christians

Progress:

- Conduct initial research into what potential problems may be resolved Network-wide.
- Get approval from the Steering Committee to pursue a solution with the Public Services Committee
- Work with Pub Serv to define problems.
- Create a subcommittee to create a plan
- Pub Serv approve plan
- Steering Committee
- New plan is implemented.

Priority Seven: SirsiDynix Supported Servers End-of-Life

After a certain amount of time vendors will no longer support hardware because it is considered outmoded. In other words parts become hard to find because they are no longer manufactured. Our servers will have this problem as of May 31st, 2016.

Goal: Have a solution in place to deal with outmoded hardware.

Project Lead: Corey Christians

Progress:

- Determine differing solutions to the problem considering we may be on a new ILS in two years.
- Present the solutions to the Executive Committee
- Present the solutions to the Steering Committee
- Analyze which option is superior based on cost and stability
- Purchase any equipment that is required
- Migrate data and go into production

Priority Eight: Implement BC Visibility

BlueCloud Visibility is a new product by SirsiDynix which converts our online catalog to a linked data model. This will make our records visible in search engines such as Google.

Goal: Implement BC Visibility

Project Lead: Chanel Wheeler

Progress:

- Receive a quote from SirsiDynix
- Get approval for the purchase
- Receive an implementation plan from SD
- Offload our bibliographic database to SD to be processed.
- Test the implementation.
- Go Live
- Advertise the new service

Prioritization

Priority Nine: Implement Blue Cloud Cataloging

Blue Cloud Cataloging will allow library staff to access Symphony cataloging from a web browser. The new product should have significant user interface improvements above the cataloging section in WorkFlows.

Goal: Fully implement Blue Cloud Cataloging (BCC)

Project Lead: Chanel Wheeler

- Upgrade Web Services so we can use BCC
- Configure Web Services for the new service
- Test BCC to see how it works
- Create documentation
- Activate it for a test library to see how it works in a production environment
- Conduct a training session for all YLN users
- Activate it for the remaining libraries

Completed Projects CY16

Draft an RFP for a new Integrated Library System

Migrate vhosts from VMWare ESXi to Microsoft HyperV

Cancelled/Postponed Projects CY16
