Monthly
Report

Manager's Lowdown

The migration of the Symphony hardware to the new virtual platform was successful. The only system remaining to be converted is the Enterprise system. I am currently working on the conversion with SirsiDynix. I will notify all of you when the transfer will happen so you can plan for the downtime. The only system that will be impacted by the downtime will be the online catalog.

The end-of-the-fiscal-year statistics will be forthcoming. These statistics will also be used for the Arizona State Library statistical report that has to be completed annually by the public libraries. The patron data purge will also be completed on July 1st as specified in the YLN policies.

Overdrive appears to have properly implemented the authentication changes. This should improve the accuracy of the statistical reporting in Overdrive. Other changes are on the horizon with Overdrive that should improve how the service works. Once such change is that Advantage items can be converted to consortial items after one year. They are still unable to prioritize holds based on the library that purchased the item. PPL has submitted a request to make this happen. Of course, we have no real ability to make it happen. We are dependent on the largesse of Overdrive. Overdrive has also not changed their position on allowing the academic, archival, and K-12 libraries to join the public libraries' contract.

The e-materials subcommittee has been successful in establishing some best practices for e-materials selection and purchase. The best practices document will be made available once completed.

Rich Lewis resigned from the Executive Committee in hopes of pursuing doctoral studies in France. He will be sorely missed as a member of that committee. I have temporarily appointed Mike Byrnes until he can

formally be elected at the next Steering Committee Meeting. This appointment was conducted with the support of the academic libraries in the YLN.

The Executive Committee did approve a couple of emergency purchases. They were the purchase of hardware to support a tertiary backup method for the ILS. Once our new backup methods are fully in place Symphony services will be backed up in the following manner:

- 1) Failover backup to a duplicate VMWare host containing up-to-the-minute data from the primary VMWare host;
- 2) Offsite backup utilizing an RDI1000 removeable drive (RDI1000 is more reliable than a tape backup);
- 3) Regular weekly and monthly backups made using Veeam to Network Attached Storage.

Each of these backup methods solves a different scenario of failure.

Respectfully Submitted,

Corey Christians
Library Network Manager

Prioritization

Priority One: Resolve Current Helpdesk Requests

A help desk request, or work order, is the submission of a problem that one encounters during the normal operation of a YLN service. Requests are generally submitted via e-mail to help@yln.info. If a request is submitted via telephone, then a YLN staff person will create the request for the submitter. Help desk requests will always be our highest priority because in some cases a member library employee cannot complete a work function until the issue is resolved.

Total requests submitted: 70

Total requests resolved: 33

Total unresolved requests opened this month: 2

Total requests still open: 44

Priority Two: Draft an RFP for an RFID and AMH System

The time is here to start looking into the possibility of purchasing a new Radio-Frequency Identification (RFID) and/or Automated Materials Handling (AMH) system. Stage one is drafting the RFP.

Goal: Create a request for proposal for an RFID/AMH system.

Project Lead: Corey Christians

Progress:

- Explore RFID RFP options
- Install a wiki that can be used to gather information about what we want in an RFID System
- Test the wiki to make sure it works
- Form an RFP committee
- Survey the current RFID market
- Have an initial RFP meeting
- Update the wiki with the results
- Start work on the RFP
- Create a draft RFP
- Send the RFP out to the membership for comment
- Create the final draft
- Seek steering committee approval
- Distribute to all interested vendors

Note concerning prioritization: The priority of projects may shift as individual portions are completed.

Priority Three: Negotiate ILS Contract

Now that an ILS vendor has been selected the contract needs to be negotiated.

Goal: Establish a new contract with an ILS vendor

Project Lead: Corey Christians

- Negotiate a contract with SirsiDynix
- Draft a final version of the contract
- Bring the contract to the YCFLD BoD for approval
- Get appropriate signatures from the YLN membership if appropriate
- Submit to SirsiDynix for their signature

Priority Four: Install BlueCloud Analytics

Currently the YLN uses Director's Station for all web-based statistical reporting. BlueCloud Analytics is meant to be a replacement for Director's Station. However, the products differ greatly. Because of this we have been holding off migrating to the new product until its functionality matches Director's Station.

Goal: Complete the transition to BlueCloud Analytics

Project Lead: Chanel Wheeler

Progress:

- Upgrade our BlueCloud framework to accommodate analytics
- Install BlueCloud Analytics.
- Create several test reports to verify functionality
- Create templates to match DS reporting
- Train member libraries once transitioned to BCA

Prioritization

Priority Five: YLN Strategic Plan

While the YLN has been very good about technology planning, the overall vision and strategy of the YLN has been more elusive. The Executive Committee has been working on developing a vision, mission, and strategic plan.

Goal: Develop a strategic plan that will bring the YLN to the year 2025.

Project Lead: Corey Christians

Progress:

- Create a way to implement the plan
- Get approval for the updated plan
- Change the bylaws if necessary
- Distribute the new plan

Priority Six: Network-wide Electronic Resources

In order to address the burgeoning usage of electronic materials the Public Services Committee will take the lead on creating a Network-wide e-materials collection development policy or best practices document.

Goal: Discover a method to increase utilization, improve the customer experience, and increase acquisitions fairness throughout the Network.

Project Lead: Corey Christians

Progress:

- Conduct initial research into what potential problems may be resolved Network-wide.
- Get approval from the Steering Committee to pursue a solution with the Public Services Committee
- Work with Pub Serv to define problems.
- Create a subcommittee to create a plan
- Pub Serv approve plan
- Steering Committee
- New plan is implemented.

Priority Seven: SirsiDynix Supported Servers End-of-Life

After a certain amount of time vendors will no longer support hardware because it is considered outmoded. In other words parts become hard to find because they are no longer manufactured. Our servers will have this problem as of May 31st, 2016.

Goal: Have a solution in place to deal with outmoded hardware.

Project Lead: Corey Christians

Progress:

- Determine differing solutions to the problem considering we may be on a new ILS in two years.
- Present the solutions to the Executive Committee
- Present the solutions to the Steering Committee
- Analyze which option is superior based on cost and stability
- Purchase any equipment that is required
- Migrate data and go into production
- Install Veeam
- Migrate Enterprise

Priority Eight: Implement BC Visibility

BlueCloud Visibility is a new product by SirsiDynix which converts our online catalog to a linked data model. This will make our records visible in search engines such as Google.

Goal: Implement BC Visibility

Project Lead: Chanel Wheeler

Progress:

- Receive a quote from SirsiDynix
- Get approval for the purchase
- Receive an implementation plan from SD
- Offload our bibliographic database to SD to be processed.
- Test the implementation.
- Go Live
- Advertise the new service

Prioritization

Priority Nine: Implement Blue Cloud Cataloging

Blue Cloud Cataloging will allow library staff to access Symphony cataloging from a web browser. The new product should have significant user interface improvements above the cataloging section in WorkFlows.

Goal: Fully implement Blue Cloud Cataloging (BCC)

Project Lead: Chanel Wheeler

- Upgrade Web Services so we can use BCC
- Configure Web Services for the new service
- Test BCC to see how it works
- Create documentation
- Activate it for a test library to see how it works in a production environment
- Conduct a training session for all YLN users
- Activate it for the remaining libraries

Completed Projects CY16

Draft an RFP for a new Integrated Library System

Migrate vhosts from VMWare ESXi to Microsoft HyperV

Select ILS Vendor

Cancelled/Postponed Projects CY16
